

Network Reconnaissance Report

Target

Metasploitable 2

IP Address

192.168.59.128

Date

13 July 2026

Objective

Perform network reconnaissance against a vulnerable machine.

Tools Used

Nmap 7.99
VMware Workstation
Kali Linux

Summary

The scan identified 23 open TCP ports.
Services such as FTP, SSH, HTTP, Samba, MySQL, PostgreSQL,
Tomcat, and VNC were detected.

Key Findings

-
- Anonymous FTP enabled
 - Samba service detected
 - Telnet enabled
 - Apache Web Server running
 - MySQL exposed

Conclusion

The target intentionally exposes multiple services
for security testing purposes.
